GRANDEZA × NEWO.AI

# Making TCPA a reason to buy, not a reason to stall.

A channel proposal: free co-branded compliance scoring for Newo prospects, an embedded recurring tier that pays partners, and joint go-to-market for the trades.

PREPARED FOR NEWO.AI PARTNERSHIPS · JULY 2026

**Kai Cogmon · Founder, Grandeza · kai@grandeza.io · grandeza.io**

WHY WE ARE BRINGING THIS TO YOU NOW

# You already built the rails.
# We want to put something on them that closes deals.

### 1 A CEO hired for exactly this

Newo appointed Jason Luo CEO in April 2026 — the announcement headline says “to Accelerate Partner-Led Growth.” The named target channels are MSPs, VoIP providers and software platforms.

NAMED TARGET CHANNELS

MSPs | VoIP PROVIDERS | SOFTWARE PLATFORMS

### 2 A channel already at scale

Newo reports 200+ certified partners — the public directory currently lists about 24, and the figure is unchanged between the February and April releases. Level A/B/C revenue share, white label and the IONOS deal are all live.

### 3 Aimed straight at our beachhead

Newo runs a dedicated HVAC & plumbing page promising to book jobs 24/7. Home services is exactly where we operate — and exactly where TCPA exposure is highest.

NEWO.AI, 2026 TO DATE

- 14 JAN 2026 — IONOS distribution partnership
- 10 FEB 2026 — $25M Series A · 200+ partners
- 21 APR 2026 — Jason Luo appointed CEO
- JULY 2026 — This proposal

*Sources: GlobeNewswire, 21 Apr 2026 (CEO appointment) · GlobeNewswire, 10 Feb 2026 (Series A, 200+ partners) · newo.ai/partners · newo.ai/hvac-plumbing-ai-receptionist*

THE PROBLEM WE SOLVE FOR YOU

# One objection stalls the trades deal.

“

## If this thing calls and texts my customers automatically — am I going to get sued?

Every contractor evaluating AI voice asks a version of this. Right now the honest answer most vendors can give is a shrug and a link to a DNC setting. That shrug is where the deal slows down, the legal review starts, and the close date slips a quarter.

TCPA FILINGS · APRIL 2026

Year-over-year growth in total TCPA filings — 330 cases in April 2026. Class actions hit a record 255 that month, separately up 38.5%.

**$2.875M**

Starling v. Farmers Insurance Exchange, No. 26SL-CC00138 (Mo. Cir. Ct.) — calls and texts tied to one agency’s outreach.

**$500–$1,500**

Statutory damages per individual call or text. Exposure scales with the size of the list, not the size of the shop.

*Sources: TCPAWorld / WebRecon filing data, 4 Jun 2026 · Starling v. Farmers Insurance Exchange, No. 26SL-CC00138 (Mo. Cir. Ct., St. Louis Cty.), publicized late June 2026 · 47 U.S.C. §227 statutory damages.*

THIS IS SETTLED LAW, NOT SPECULATION

# The regulator already decided that AI voice is covered.

## AI voice = “artificial voice”

The FCC ruled that AI-generated and cloned voices are “artificial” under the TCPA, with no carve-out for technology designed to sound like a live agent. Consent, identification and opt-out obligations all attach.

FCC DECLARATORY RULING · FEB 2024

## Opt-out is live law today

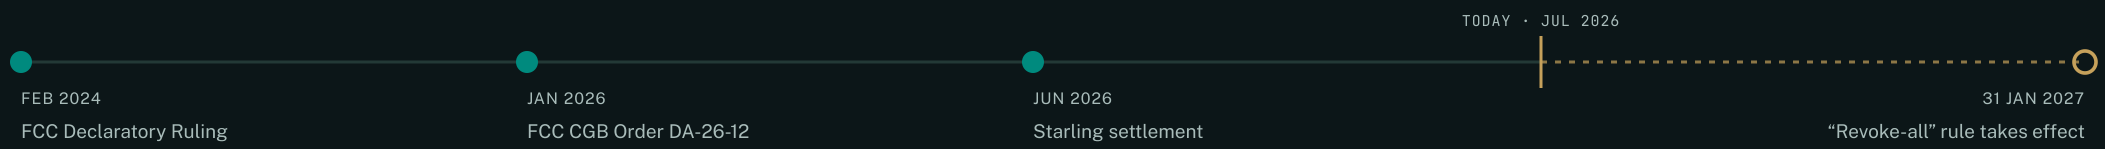

The FCC pushed the “revoke-all” rule to 31 Jan 2027 — but every other revocation duty is in force now. A system that keeps messaging after STOP is an open-and-shut violation.

FCC CGB ORDER DA-26-12 · JAN 2026

## Liability follows the seller

In the Farmers matter the calls and texts came from an agency selling the product. The company whose product was being sold still paid. Contractors sit in the same structural seat.

STARLING SETTLEMENT · PUBLICIZED LATE JUN 2026

*Sources: FCC Declaratory Ruling on AI-generated voice, 8 Feb 2024 · FCC Consumer & Governmental Affairs Bureau Order DA-26-12, 6 Jan 2026 · Starling v. Farmers Ins. Exch., No. 26SL-CC00138.*

WHERE THE EXPOSURE ACTUALLY SITS

# Newo does not just answer calls. Newo places them.

FROM NEWO.AI'S OWN PUBLISHED PAGES:

> *"AI telemarketer: Dial thousands of contacts from uploaded lists."*

> *"AI SDR makes 500+ parallel outbound calls during peak hours."*

> *"Re-engages dormant customers for maintenance."*

> *"Run promotional campaigns across ZIP codes."*

THE PUBLISHED COMPLIANCE POSTURE

> *"Our automated calling service integrates with DNC registries and respects your uploaded suppression lists."*

The complete published TCPA position on the outbound page. No consent capture, no calling-window rules, no AI disclosure, no opt-out architecture.

PUBLISHED TCPA CONTROLS · OUTBOUND PAGE

| | |
|---|---|
| DNC registries & uploaded suppression lists | STATED |
| Consent capture | NOT STATED |
| Calling-window rules | NOT STATED |
| AI disclosure | NOT STATED |
| Opt-out architecture | NOT STATED |

WHAT THE CONTRACT DOES SAY

§6.2 makes the customer solely responsible for complying with "any Laws"; §6.4 requires them to indemnify Newo. The exposure is already routed to the contractor.

*None of this is a knock on Newo — it is where the whole category sits. The ISO 27001, HIPAA and GDPR work already done proves the appetite for regulated procurement; those frameworks govern how data is stored, not whether a number consented to be dialed.*

*Sources: newo.ai/ai-calling-software · newo.ai/hvac-plumbing-ai-receptionist · newo.ai/terms-of-service §6.2 and §6.4 (reviewed 28 Jul 2026).*

WHY THIS IS A CHANNEL QUESTION

# A single-account problem multiplies through a partner network.

1

### Newo platform

Outbound dialing, SMS and reactivation shipped as core capability.

2

### 200+ certified partners

Level A/B/C resellers deploy those campaigns on behalf of their own clients.

3

### White-label books

End customers see the partner’s brand — no “powered by Newo” disclosure.

4

### Thousands of contractors

Each running texts and calls against lists whose consent nobody has verified.

> The asymmetry: the revenue from those campaigns is distributed across the channel — but the headline, if one is ever written, names the platform.

*Sources: newo.ai/partners (Level A/B/C tiers, certification) · newo.ai/white-label · partners.newo.ai/partners (public directory).*

WHAT WE BRING

# Grandeza is the compliance layer for AI-driven customer contact.

## The Score

FREE · 0–100

A versioned, published standard scoring a shop across 16 controls: consent capture, opt-out handling, calling windows, AI disclosure, recordkeeping. Co-brandable and built to be given away.

## Guardian

RECURRING MONITORING

Continuous monitoring that keeps the score true over time and produces dated evidence — living proof rather than a one-time certificate that goes stale the week after it is issued.

## The Binder

UNDERWRITING ARTIFACT

The evidence pack, assembled for insurers and defense counsel. Our roadmap is to make it a recognized risk-management control that earns premium credit.

> *The strategy in one line: make the Grandeza Score the credit score of contractor communication compliance — free and public at the top, monetized on remediation and proof underneath.*

THE PROPOSAL

# Three things, none of which require Newo to build anything.

### 1 A free co-branded Score for every Newo prospect

Your rep hands a stalling contractor a Newo-branded compliance readout instead of a shrug. The objection becomes a reason to move forward with you — and we generate the report, not your team.

### 2 "Compliance Verified" embedded tier — $99/mo, 25% to Newo

A recurring add-on attached at the point of sale. Newo keeps 25% for the life of the account — incremental margin on revenue you are not capturing today, with no delivery cost, no support load and no COGS.

### 3 Joint go-to-market into the trades

A co-authored "TCPA-safe AI intake" one-pager and webinar your 200+ partners can put in front of HVAC and plumbing buyers. We write it; you distribute it; both logos.

HOW THE ATTACH FLOWS

STEP 01
**Newo rep hands over the Score**
FREE · CO-BRANDED

→

STEP 02
**Contractor attaches Compliance Verified**
AT THE POINT OF SALE

→

STEP 03
**$99/mo billed and supported by Grandeza**
NO NEW BILLING RAILS

→

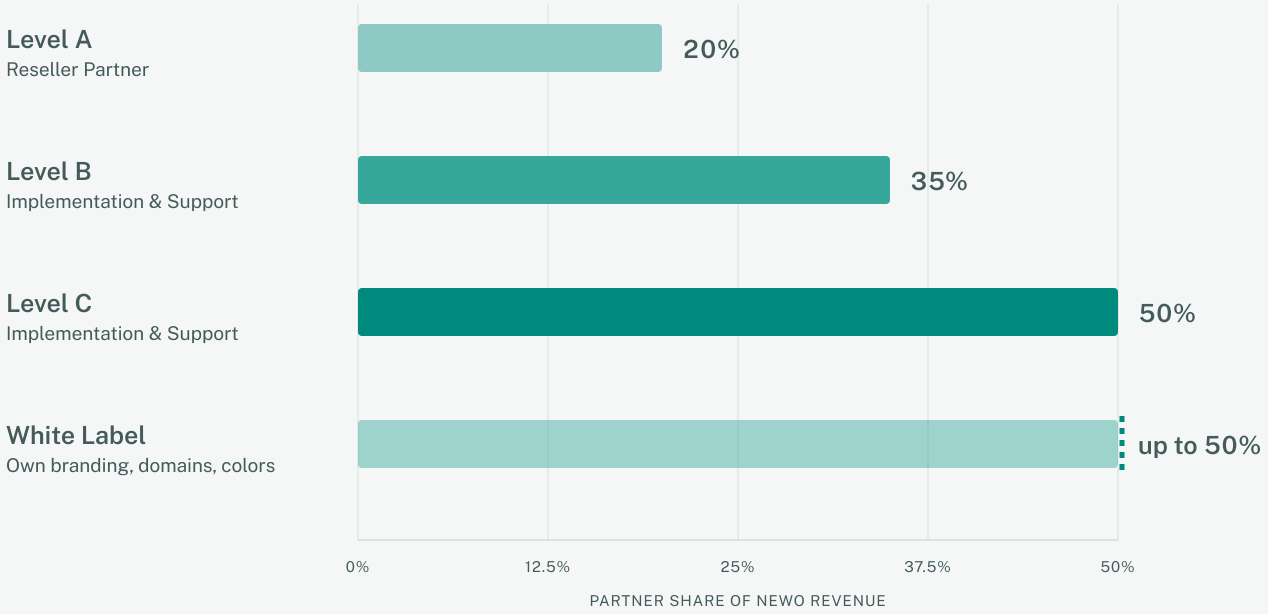

RESULT
**Newo keeps 25% — $24.75/mo, recurring**
NO COST · NO SUPPORT LOAD · NO COGS

> Net effect: a faster close on the deals you are already working, plus recurring margin on an attach you never have to service.

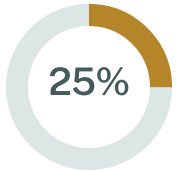

COMMERCIAL FIT

# It plugs into the program you already publish.

NEWO'S PUBLISHED PARTNER TIERS

WHERE COMPLIANCE VERIFIED SITS

**25% of $99/mo, recurring**

SHARE OF THE GRANDEZA ATTACH

Sold as an attach on any tier. No new billing rails, no new support burden, no certification track to invent — your existing two-week partner onboarding already carries it. Grandeza delivers and supports the compliance product; Newo collects the share.

ATTACHABLE ON

LEVEL A | LEVEL B | LEVEL C | WHITE LABEL

> The one commercial ask: let Compliance Verified be listed as an approved add-on in the partner marketplace, so any Level A–C or white-label partner can attach it without a bespoke agreement.

*Source: newo.ai/partners and newo.ai/white-label, tier names and published revenue-share percentages reviewed 28 Jul 2026.*

THE ECONOMICS

# Price it at the partner layer, not against list.

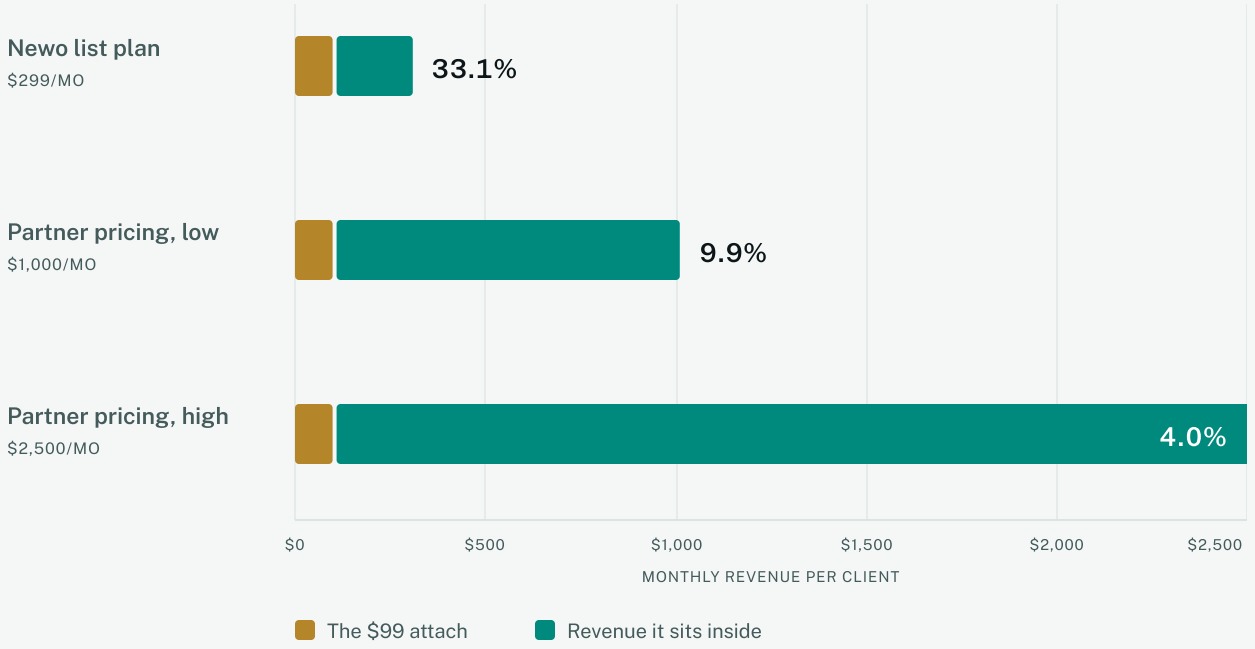

A $99/mo attach reads very differently depending on which number you hold it against. Against Newo's $299 flagship plan it looks heavy. Against what partners actually charge — a published $1,000–$2,500/mo per client — it is a rounding error on a line item that removes the buyer's biggest hesitation.

WHAT NEWO EARNS PER ATTACHED ACCOUNT

**$24.75** per month, recurring, for the life of the account

*25% of $99 — no delivery cost, no support load, no COGS to Newo.*

A $99 ATTACH, AS A SHARE OF REVENUE

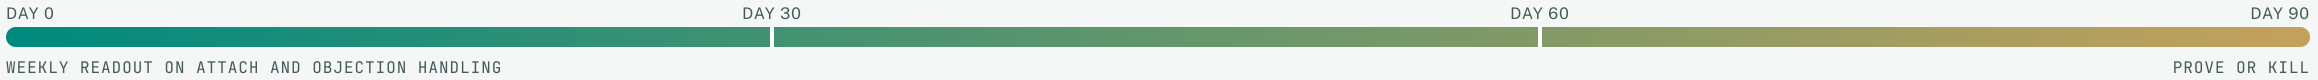

*Sources: newo.ai/pricing ($299/mo AI Receptionist plan) · newo.ai/white-label (partner end-client pricing of $1,000–$2,500/mo). Percentages are arithmetic on those published figures.*

WHAT WE ARE ASKING FOR

# A 90-day pilot in one vertical.

Small enough that it does not need a committee. Specific enough to prove or kill quickly.

## Grandeza provides

- Co-branded Score for HVAC & plumbing prospects
- Compliance Verified provisioning and support
- The joint one-pager and webinar content
- Weekly readout on attach and objection handling

## Newo provides

- 10–15 partner accounts, or one vertical pod
- A marketplace listing for the add-on
- Intro to 3–5 partners already selling into the trades
- A named point of contact for the 90 days

> Success test, agreed up front: attach rate on new trades deals, and whether reps report the legal objection resolving inside the first call instead of a second legal review.

NEXT STEP

# Twenty minutes, and we bring a live co-branded Score.

We will build a working Newo-branded compliance readout for a real HVAC use case before the call, so the conversation is about whether you want it in the channel — not about whether it exists.
